Risk and Reward Profile

The risk indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean a risk free investment.

The indicator is designed to help investors understand that they may lose their money.

- The value of shares or derivatives may be affected if the company pays less than the dividend expected, or pays no dividend.
- Changes in currency exchange rates may cause the real value of your investments to decrease or increase even if the price of the stock is rising.
